

Completion Report

Regreen Earth Episode VII

Project Name: Regreen Earth Episode VII

Venue: Udispattuwa, district of Kandy, Sri Lanka

Date of the Event: 11th June 2022

Process of the Event:

The 7th episode of the Sasnaka Sansada Regreen Earth project organized by the Sasnaka Sansada Kandy team was held under 2 stages recently. **This project was supported by the SUMAGA Foundation based in Norway.**

This project had following stages.

Stage 1-Preparation

As the 1st stage of the project, we selected a sustainable partner to maintain the planted trees. We were happy to select Udispattuwa Secondary School for that, which is located in the town of Theldeniya, at the catchment area of Victoria Reservoir.

Next step was to prepare the school premises. This was done on 4th of June 2022 with the participation of the members of the Sasnaka Sansada Kandy district team. Three main areas of the school were prepared for the tree plantation. As the preparation stage the recognized areas were prepared by digging 250 pits for the plantation.

Stage 2-Main Event

This has took place on the 11th June 2022 with the participation of the Sasnaka Sansada President, and volunteers around 80 pupils. Members from Kandy, Mathale, Nuwara Eliya, Badulla and Kurunegala teams of Sasnaka Sansada family took part in this meritorious event. In addition, 5 staff members of the school and 11 students, participated in this event.

In this stage the participants were informed about the proper way of planting the plants. Plants with high value such as Mee, Karada, Cinnamon, Pomegranate and Weralu were planted. In total 250 plants were planted. As the fertilizers, the compost fertilizer was used.

Sustaining the plants:

The group of students of the school who participated in the event were well informed by the organizers regarding the way of sustaining the plants, by looking after them.
